Pharmacy context and inspection background

This pharmacy is located on a business park in Chester. It operates an NHS internet pharmacy and there is no physical access for patients or the public. The core function of the pharmacy is the provision of medicines, dispensed for named patients, for institutions predominantly registered by other UK regulators. These are typically independent mental health hospitals but also other organisations including ophthalmic hospitals and social care services. Most medicines are dispensed in conventional containers, but also a significant number were supplied in compliance packs. The pharmacy also provides the NHS New Medicine Service (NMS).

This was the first routine inspection of the pharmacy since it relocated from nearby premises in October 2024.

Overall outcome: Standards met

Required Action: None

Areas of good practice

Standard 1.2

- Adverse dispensing incidents are recorded and reviewed, using a multi-disciplinary approach, so

that learning points can be identified and shared with the wider team.

Standard 2.2

- A thorough induction programme is in place, and this is followed by appropriate training to help ensure that staff have the necessary skills for the specialist services provided.

Standard 2.4

- Staff work well as a team and are knowledgeable about the operation of the pharmacy. Staff take on the responsibility of risk assessing the services they provide and there is evidence of shared learning between members of the team.

Standard 4.2

- The pharmacy operation is well organised and there are various safeguards in place for some of the high-risk services provided such as the supply of clozapine to help ensure the safe delivery of services.
