Standards that were met with areas for improvement

Standard 1.2

- The pharmacy team can describe some changes they make following dispensing mistakes identified within the pharmacy, to reduce the risk of them happening again. But they do not record dispensing mistakes when they happen, or the actions they take. So team members may

miss opportunities to learn when things go wrong.

Standard 4.3

- The pharmacy has some records of fridge temperatures to show medicines are stored appropriately. But team members are not always consistent with the recording of fridge temperatures to ensure medicines are stored appropriately and are safe to supply.
