Pharmacy context and inspection background

This is an online pharmacy based in Blackburn. It provides private online services through its website www.cuvahealth.co.uk. The pharmacy dispenses private prescriptions, generated by its pharmacist independent prescriber. Prescriptions are mainly for weight management treatment and a lesser amount for other conditions such as erectile dysfunction and hayfever. It delivers medicines via courier to people living in the UK.

This was the first routine inspection of the pharmacy since it was registered in November 2024. The pharmacy started trading in August 2025.

Overall outcome: Standards not all met

Standards not met

Standard 1.1

- The pharmacy doesn't have standard operating procedures or prescribing policies for its private prescribing service available for team members to refer to. This means that the pharmacy cannot show how it ensures team members, including the prescriber, work consistently and provide the

pharmacy's services safely.

Standard 4.2

- The pharmacy doesn't appropriately verify the information people provide when requesting weight loss treatment. The prescriber uses photos to assess people's BMI without any further independent verification of the information people declare relating to their weight, height and health conditions on the assessment form. So there is a risk that people may get medication that is not appropriate for them.
