Pharmacy context and inspection background

This is a distance-selling pharmacy (www.monivearoad.co.uk) and mainly supplies specific controlled drugs. The pharmacy currently only dispenses private prescriptions from a third-party clinic. People using the pharmacy are based in the UK. The pharmacy is closed to the public and situated in an office building and medicines are delivered to people via courier.

This was the first routine inspection of the pharmacy since it was registered in December 2024.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has undertaken risk assessments about its services, which outline most of the risks and mitigation taken to reduce the risks. However, the documented risk assessments do not cover all potential areas of risk associated the pharmacy's services. For example, they do not cover individual medicines or formulations supplied, shortages, or fraudulent ID or prescriptions.

They also do not cover how the pharmacy will tackle potential IT or communications failures. By including these areas, the pharmacy would be able to better demonstrate that it understands the potential risks associated with its services and has adequate contingency arrangements in place.

Standard 1.6

- The pharmacy generally keeps the records it needs to by law. But some of its records do not contain all the required information including the correct dispensing date for prescriptions and all the required information about the unlicensed medicines it supplies. This could make it harder for the pharmacy to respond to future queries about the supplies it has made.
