### Standards not met

#### Standard 1.1

- The pharmacy hasn't completed a risk assessment of the online prescribing service it's associated with as required by the GPhC's guidance for registered pharmacies providing pharmacy services at a distance, including on the internet. It has some written procedures, but they don't cover all the activities it undertakes especially in relation to the associated prescribing service. And the procedures don't include all the things they need to by law.

## Standard 4.4

- The pharmacy can't show what action it has taken about previous safety alerts and recalls. This means it can't demonstrate that it responds appropriately to safety alerts and recalls, ensuring people only receive medicines which are suitable for use.
