Pharmacy context and inspection background

This community pharmacy is based in the health centre in Market Harborough. Its main activity is dispensing NHS prescriptions. It also sells medicines over the counter and offers the NHS Pharmacy First service, Hypertension case-finding service, and contraceptive service. It supplies medicines in multi-compartment compliance packs to people who need this support to help them take their medicines at the right time. It offers some private services including travel vaccinations and weight management.

This was the first routine inspection of the pharmacy since it opened in February 2025.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy team dispenses medicines safely. But the pharmacy's standard operating procedures (SOPs) do not reflect changes introduced as a result of the updated patient

medication record system. This might make it more difficult for team members to work effectively and within current best practice.

Standard 1.2

- Pharmacy team members talk about the mistakes they make to try to learn from them. But they don't review them periodically. So they may be missing opportunities to spot patterns or trends and take effective action to help prevent the same sort of things happening again.

Standard 4.2

- The pharmacist gives a range of advice to people using the pharmacy's services. This includes advice when they have a new medicine. But they do not routinely give advice to people taking medicines that require ongoing monitoring and management so the pharmacy may miss opportunities to provide additional information when people collect their medicines.
