Pharmacy context and inspection background

This community pharmacy is on a main shopping street in the Nottinghamshire town of Eastwood. Its main services include dispensing NHS prescriptions and selling over-the-counter medicines. It provides NHS consultation services including Pharmacy First, blood pressure checks, contraception services, seasonal flu vaccinations and the New Medicine Service (NMS). And it provides some private services including travel health, ear wax removal and a weight management service. It supplies some medicines in multi-compartment compliance packs, designed to help people remember to take their medicines. And it offers a medicine delivery service.

This was the first routine inspection of the pharmacy since it was registered in May 2025.

Overall outcome: Standards met

Areas of good practice

Standard 3.1

- The pharmacy is fitted out to a good standard. Bespoke fittings support its team in managing workflow safely and efficiently between different areas of the premises.

Standards that were met with areas for improvement

Standard 1.1

- The pharmacy has written procedures to support its team members in working safely and effectively. But not all team members complete records to show they have understood these procedures within a timely manner. This means the pharmacy may find it difficult to show team members are all working in the same way and to the standards set out within the procedures.

Standard 1.2

- Pharmacy team members discuss the mistakes they identify and correct during the dispensing process. But they do not always take the opportunity to record these mistakes. This means it may be more difficult to identify trends in mistakes and to act to reduce risk.
