Pharmacy context and inspection background

This is a pharmacy with an NHS distance-selling contract situated in an industrial estate in Birmingham. Its main activity is supplying medicines to several care homes. And it dispenses medicines in multi-compartment compliance packs to some people in the community who need assistance in taking their medicines safely. Medicines are delivered via a delivery driver and members of the public do not visit the pharmacy.

This was the first routine inspection of the pharmacy since it was registered in July 2025.

Overall outcome: Standards met

Required Action: None

Standards that were met with areas for improvement

Standard 1.6

- The pharmacy generally keeps records to show that medicines are supplied safely. But some of its private prescriptions and emergency supplies records do not include all the information required. This makes it harder for the pharmacy to show that it keeps all its records in line with statutory

requirements. And makes these records less reliable in the event of a future query.

Standard 4.4

- The pharmacy has systems to address concerns about medicines or medical devices not fit for purpose. However, team members do not keep records to show what action they have taken in response to medicine recalls and drug safety alerts. This makes it harder for the pharmacy to demonstrate it has taken appropriate and timely action in response to these.
