

Registered pharmacy inspection report

Pharmacy name: Menwell Pharmacy

Address: Unit 12 Verda Park, Hithercroft Road, Wallingford, Oxfordshire, OX10 9SJ

Pharmacy reference: 9012909

Type of pharmacy: Internet

Date of inspection: 24/03/2026

Pharmacy context and inspection background

This is a distance selling pharmacy in a business park in Wallingford in Oxfordshire. The pharmacy dispenses treatments prescribed by a team of healthcare professionals for weight loss, hair loss, testosterone replacement therapy (TRT), erectile dysfunction (ED) and menopause. Menwell Pharmacy provides its services online so people do not visit the pharmacy premises in person.

This was an intelligence-led inspection of the pharmacy following information received by the GPhC. Not all the Standards were inspected on this occasion.

Overall outcome: Standards not all met

Required Action: Improvement Action Plan

Standards not met

Standard 1.1

- The pharmacy cannot provide sufficient assurance that the prescribing service it works with is getting all the information it needs to make safe prescribing decisions. This is because the prescribing service does not independently verify the information supplied by people including

their medical history and co-morbidities, as required by the GPhC 'Guidance for registered pharmacies providing pharmacy services at a distance, including on the internet'. This increases the risk that people can obtain medicines from the pharmacy that are not clinically appropriate for them to take by providing false or incomplete information.

Standard 4.2

- The pharmacy doesn't currently carry out independent clinical checks of the majority of the prescriptions it dispenses. Its dispensing process, coupled with the high volume of prescriptions it dispenses, currently does not adequately support the pharmacy team members in making meaningful clinical interventions on most of the prescriptions it dispenses. It largely relies on its prescribing service to make the necessary checks. This increases the risk that people are supplied with medicines that are not clinically appropriate for them.
