Summary:

The pharmacy has not met the Standards for Registered Pharmacies in consecutive inspections and cannot show that restricted activities have always had the required oversight by a Responsible Pharmacist. And there is some evidence that indicates it has not taken adequate or appropriate action to minimise risks to patients when there have been concerns raised about the quality of medicines. This means there are serious concerns about the pharmacy's ability to operate safely and effectively. The concerns are ongoing, and patients and members of the public continue to use the services of the pharmacy. It is therefore necessary to impose the condition with immediate effect to protect the health, well-being and safety of patients and members of the public.

Conditions imposed:

1. The pharmacy must not obtain, sell or supply any prescription only medicines or medical devices.
